

tabernacle : penarth

purpose: to reflect God's love in our church,
community and world.

**environmetal
policy**

Tabernacle Baptist Church recognises that the natural world belongs to God, but that we individually, as a church and as a nation are responsible for damage which impacts disproportionately on poor and vulnerable communities.

Consistent with our mission to show God's love in our church, community, and the world, we commit ourselves to repent, and seek ways to first limit and then actively repair the world we have been given in trust.

In particular we will:-

Appoint a specific member of the Leadership Team to take responsibility for this policy and to oversee progress of the environmental action plan.

When purchasing goods, services, energy or transport consider the impact on the environment, in order to eliminate or minimise adverse impacts.

Take steps to minimise waste, and to seek opportunities to reuse, recycle or dispose of it responsibly.

Take opportunities to recognise and celebrate the importance of the natural world in our corporate life together.

Produce a specific environmental action plan which identifies areas of adverse impact, and specific opportunities for improvement.

Review the action plan regularly, and annually at the AGM.
